

## DESCRIPTION

---

The fabulous Crystal of 10W is a light fitting that has a very different design from all other Interior Lighting range products for ceiling, due to its rectangular shape and because it can be surface mounted. With a very high CRI – 90 – and 36° or 60° beam angle, this luminaire can reach 825 lumens. However, if you need more luminosity in the room, you can choose the other version of this product, the 20W Double Crystal, that although it has almost all of the characteristics of the original version, its luminous flux is much superior, reaching 1650 lumens. With these two versions, with an attractive, aesthetic and modern design, it's possible to combine the luminous flux and light the space according to its needs.
