

DESCRIPTION

PROLINER MICRO FLAT light modules — available in OPAL or LOW GLARE versions — are extremely narrow and compact, creating an ultra-thin line of light on the ceiling or wall. The opal polycarbonate diffuser delivers smooth, uniform light, while the low glare reflector emits recessed points of light, significantly reducing the Unified Glare Rating (UGR), minimizing visual discomfort and protecting the eyes. Designed for installation in low-voltage MICRO tracks (48V), these modules are ideal for projects where lighting must be effective yet visually discreet — almost imperceptible.
