

DESCRIPTION

The PROLINER is a magical line of light. Consisting of particularly narrow modules, it allows the creation of a versatile light line in a low-voltage magnetic rail. It is composed of 3 different light modules. A module with opal or prismatic polycarbonate diffuser, a module with a low glare reflector, and a module with a 60° lens to control the beam angle. By combining these modules, the PROLINER draws a thin and elegant light line through its opal polycarbonate diffuser. In the low glare version, the light is emitted in a recessed way, protecting the eyes and highlighting the more reliably colours of the lightened objects. The option with a 60° lens allows creating the best light distribution according to the space and to focus the light on specific points. The magnetic application allows the greater flexibility of light configuration in space, and can be reconfigured with complete freedom, without resorting to specialized technicians or special tools. The magnetic rails where the PROLINER is installed are low voltage (48V). PROLINER has been specially designed to be combined with APALIS or ROSS. These discreet application luminaires in magnetic rails are specially intended for lighting projects where the reconfiguration of spaces and objects may occur regularly, such as, stores, art galleries, museums, exhibition venues, etc... Together, these products can make your lighting project a truly magical space.

MOUNTING TYPE	Magnetic
LIGHT DISTRIBUTION	Directa
POWER SUPPLY	48V / TRACK
WARRANTY	5 Years
FINISHING	Black, White
CONTROL	CASAMBI, DALI, ON/OFF

LED FEATURES

LUMINOUS EFFICIENCY	UP TO 113 lm/W
CRI	CRI→95
LIFESPAN	50.000 Hours
STEPS MACADAM	3 Steps MacAdam
LUMEN MAINTENANCE	L90/B50
PHOTOBIOLOGICAL RISK	RG1

ICONOGRAPHY
