# brilumen®

DESCRIPTION

NOTE: The price listed below is for 1 meter.
The item is sold in 5 meters reel, so the minimum order is 5 meters.
Please insert 5 units into the shopping cart, or multiples of this value.

The light is not limited to warm or cold white. In some places, other colours may be required to create the desired environment. Being aware of this possibility, Brilumen presents the RGBW LED Strip, which with the right controller, allows you to switch between red, green, blue and white colours and to adjust the luminous intensity. This LED strip with 14.4W/m and 24V DC is quick to apply because of the double-sided adhesive tape on the back, often being used in different types of projects due to their reliability, flexibility and a high ingress protection rating - IP65. Set your imagination free and create numerous designs without forgetting that you can change the ambiance colour whenever it is necessary.
POWER SUPPLY   24V / 50-60 Hz
